Details define the brand

Private branding isn't just about putting your name on something—it's about standing behind it. That's why every hinge we use is riveted, not spring-loaded. Rivets last longer, adjust better, and signal quality the moment someone picks up the frame.

We use only Grade A acetate sourced from the finest suppliers. Not plastic. Not molded. Real, richly patterned acetate that holds shape, takes adjustment, and looks better over time. The color you choose becomes part of your story—classic havanas, modern clears, or soft neutrals that whisper luxury.

Our designs aren't chasing trends. They're inspired by timeless icons: black cocktail dresses, white oxfords, tortoise shell glasses that say more with less. Because when it's your name on the temple, the frame should speak with quiet confidence.

An Ode to Havana

Few colors in eyewear carry the soul of Havana. Layered like aged tobacco and rich like amber rum, Havana acetate is more than a shade, it's a mood. A swirl of golden browns and honeyed tones that feel warm, familiar, and undeniably timeless.

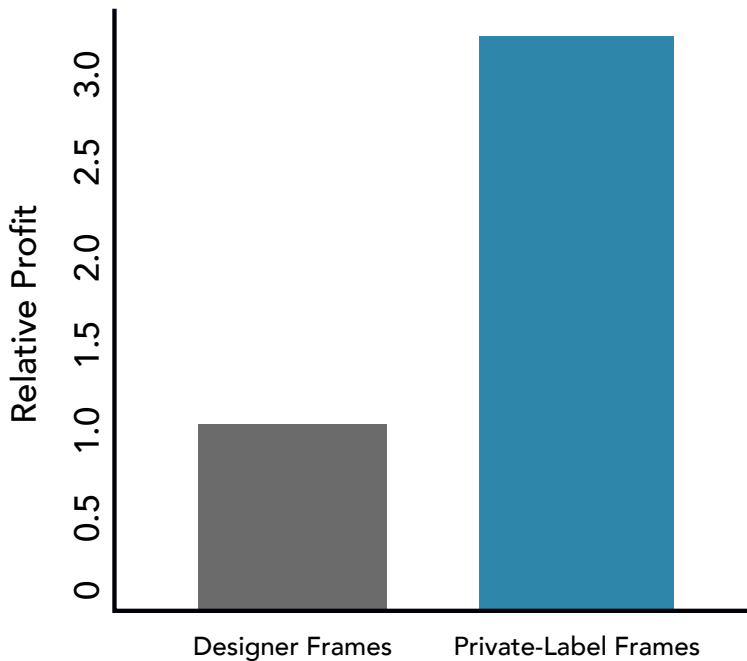

We source our Havana acetate from the world's top producers, including Mazzucchelli (Italy), Laes, and Takiron (Japan). Each sheet is Grade A quality, ensuring the depth, polish, and durability your brand deserves. No two patterns are ever the same, and that's the beauty of it. When your name is on the temple, every detail matters.

The Numbers Don't Lie

Designer vs Private Label Profits

Designer frames deliver prestige — but not profit. Private label flips the equation: same quality, higher margins, and patients who trust your name over someone else's.

60% of patients who don't find what they want in your practice... buy somewhere else. What most are looking for are NOT designer brands. Every walkout is lost revenue — and lost loyalty. Private labeling keeps them in your chair and in your brand."

Quality Begins Where Craftsmanship Lives

Every frame we make starts with the materials that define true luxury—premium acetate milled for clarity and depth, riveted hinges engineered for longevity, and surfaces polished by hand until they glow with a glass-smooth finish.

Because we own our factory, nothing is outsourced, rushed, or left to chance. Our team controls every step—cutting, shaping, tumbling, beveling, assembly, and final inspection—ensuring each piece reflects the precision and pride of a single, unified process. No mixed suppliers. No inconsistent standards. No compromises.

This is eyewear built the way it should be: thoughtfully crafted, meticulously finished, and made with the same care you expect your own brand to stand for. When your name goes on the temple, the quality behind it matters.

The 4 Myths of Private Labeling

Myth 1: Only designers make beautiful frames.

Truth: Private label frames are exactly the same. Your patients can't tell the difference — except your margin is bigger.

Myth 2: Private label is difficult.

Truth: We do the hard work — you just add your name.

Myth 3: Designer = higher profits.

Truth: Private label margins are much bigger — and you keep loyalty among your patients.

Myth 4: Waiting will fix things and my capture rates will grow.

Truth: Every day you delay, patients buy elsewhere.

Private label isn't a risk — it's your competitive edge.

Leave the fleeting trends to designer brands — your strength lies in owning the classics. These are the shapes and colors patients return to year after year, the frames that carry your name and keep loyalty in your practice.
